Attachments: [Information of what happens next.docx](#)

Todd, FYI, attached is a file with some information about what would happen next at Wilcox, why it is so important to find PRPs, and if they are liable and can afford (\$\$\$) implementing the response.

These are the EPA steps before an RI/FS is performed at the site. The EPA "Enforcement First" requires to try to identify viable PRPs, negotiate with these PRPs, so that they could do an RI/FS under the EPA and state oversight.

Other information in this write up covers what about residential homeowners, property owners and those located over a contaminated aquifer.
